I just upgraded my Mac OS from Snow Leopard to Mountain Lion. The upgrade deletes all Java VM's/JDK's. The Oracle JDK can be

downloaded from Oracle's site at

<http://www.oracle.com/technetwork/java/javase/downloads/jdk7u7-downloads-1836413.html>. JVisualVM is no longer packaged with the JDK but can be easily downloaded from <http://visualvm.java.net/index.html>.
